our art collection

The Hotel proudly displays a large private collection of original artwork and showcases the extraordinary talent of some of KwaZulu-Natal's most respected artists.

making a difference

We respect the environment and have introduced best practice green initiatives throughout the hotel, including the recycling of waste, water, food and other items used on a daily basis.

- Heat recovered from the hotel's air-conditioning system warms the water for the hotel's 14 swimming pools.
- Solar panels heat all of the water used in the Spa.
- Solar glazing in windows and doors assist in maintaining constant interior temperatures.
- Energy-efficient lights and lamps, as well as movement activating sensors have been installed. The sensors automatically switch off air-conditioning in the bedrooms when sliding doors to balconies are opened.
- Collection of rain-water to a large storage tank for use in the gardens.
- Treatment of grey water.
- Bamboo was used for the restoration of floors, doors, windows and joinery, a resource that replenishes itself naturally.
- The hotel's precious indigenous plants were taken to a nursery for safe-keeping during the renovation period and age-old aloes were protected. Suitable new indigenous plants have been planted extensively.
- Waste is strictly separated and all suitable waste is sent for recycling.
